**Subject:** Re: comments on draft SAB website language for methanol

There is a bit of a version control issue with the SAB language. John sent up some revised language on March 11th. Below, I accepted all all your changes and added in John's previous edits in red.

# Deliberative Process / Ex. 5

John: Thanks so much for putting all of the language in one place. very helpful!

**Deliberative Process / Ex. 5**

think that the draft charge and the note to ARs and IARs are really fine. Also, not commenting on the FRN here as I know there have been additional edits since this email!

Thanks-getting closer and closer...

Lynn

Subject: comments Re: Draft FRN for release of Tox Review of methanol (non-cancer)

I modified only a couple sentences in the Summary part, in an attempt to align this FR notice with the draft writeups prepared for posting on the SAB website and the draft Charge questions. Here is the revision, it is easiest to read using Final under TrackChanges. It would be very helpful for you, Norm and Lynn (others welcome too) to skim this. **This FR is the pacing item I think.**

For your information, here is a comparison of the language from the other writeups. These are not identical, but close:

Subject: Draft FRN for release of Tox Review of methanol (non-cancer)

Here's a draft FRN for the release of methanol (non-cancer) and announcement of a 60-day public comment period. 

## **Deliberative Process / Ex. 5**

Please send any comments to me and to Macrina Xavier by Monday morning so we can keep this moving forward. I'm assuming a March 31 release date which is a tight schedule for this FRN. It still needs to go to OGC, through NCEA clearance and to OARS for funding and be hand delivered to the federal register office before 10 am on March 28 for a March 31 publication.

Thanks, Karen
